Subject: Re: Memoire BAPE, Cultural Economy

Greetings Doug,

We appreciate you taking the time to share this information with us; it is extremely timely and relevant to activities in and around the island of Montreal, including Kahnawake and the entrances and exits of the infamous Mercier Bridge. It is sometimes difficult to have research carried out that indicates pollution from various sources and sometimes no one wants to hear it. So, we do appreciate how these concerns are documented and it sheds some light on our own pollution plight with Kahnawake being a major corridor for planes, trains and automobiles...

Nia:wen kowa,

Eva
