Projet d'implantation du terminal
méthanier Energie Cacouna

Cacouna

6211-04-00

Dear Sir,

I know talks will be going on to
sumner regarding the monstrous develop-
ment of Cacouna.

These boats are enormous and
our St. Lawrence River has been over
used for far too long.

It is time to stand up as Canada
and save our rivers, land + forests.

The oil should be liquidized at the
source, where the companies take it on
of the earth. They certainly do not need to
make more money out of the oil, they have mis-
used the earth and the people for too long.

We must stop the dams on all the rivers
that flow into the St. Lawrence as well.

Just look at the dam of the Chaudiere River
it should not block up the whole river, it
left the basin dry.

I hope these projects will be stopped
before it is too late.

Sincerely
Miss M. L. Fillion
