
BAPE-2.1

Référence:

2. La sécurité terrestre et maritime et la planification des mesures d'urgence

Demande ou Question:

- 2.1 À la figure 9.1-5 du rapport principal de l'étude d'impact (mai 2005), pouvez-vous expliquer le tableau ?

Réponse:

Figure 9.1-5 illustrates that risk reducing measures are more easily implemented in the early phases of a project. This is an important aspect of Cacouna Energy's Risk Management Principle. An example of early implementation of risk reduction measures is appropriate lay-out of the site by taking into consideration such factors as the location of the tanks relative to the cliff, the location of offices relative to potential gas leak sources and prevailing wind direction. This can be optimized with little expense in the early stages of a project, but become impractical and expensive when engineering is complete.
