
BAPE-2.4

Référence:

2. La sécurité terrestre et maritime et la planification des mesures d'urgence

Demande ou Question:

- 2.4 Quels sont les impacts de la circulation des méthaniers sur la sécurité du public dans la zone 1 ? (PR8.3, p. 4-4)

Réponse:

The LNG carrier traffic will have a negligible impact on the safety of the public along the entire waterway, including Zone 1. The extensive sea room combined with low traffic density results in a low likelihood of collision or grounding. In addition, the inherent strength and containment design of LNG Carriers provides very low likelihood of LNG release in the event of collision or grounding. The last protection barrier for the public is the long distance from possible accident spots to population centres.
