
BAPE-11.2

Référence:

11. La construction

Demande ou Question:

- 11.2 Le coût estimé du projet est de 685,6M \$, cette évaluation est plus élevée que le coût moyen prévu pour des installations comparables. Pourquoi ?

Réponse:

There are many site specific factors such as the need for site preparation, climate etc. that affect costs associated with projects such as Cacouna Energy. It is very difficult to make meaningful comparisons between projects without specific knowledge of the projects to be compared.
