**Objet:** [POLLURIEL (Bayes)] Importance of Uranium Industrie in Quebec, Canada and Worldwide

Dear Management,

with this mail I would like to underline the importance of Uranium Industry in Canada, Quebec and worldwide. In a world with more and more need of energy, increasing costs and pollution the use of cheap and clean energy such as Uranium becomes a must.

Technology and degree of safety allow our world to make use of nuclear energy. This may even avoid energy war like we are assisting in Ucrania, Iran and Iraq.

Economically makes also a lot of sense because of jobs creation around this sector. Such as explorer, engineering and building. Of course all that brings income to the government too.

We encourage you dear management to support this industry too.

Wish you all a nice weekend and best regards

Antonino Ilardo
