Objet: [POLLURIEL (Bayes)]

Dear Sirs: We all know that Quebec is a continuum of peoples with varied histories who draw inspiration from the vast and beautiful landscapes, seascapes, rivers and biodiversity and richness gracing "La Belle Province". The world today is in desperate need of moral leadership, leadership which values life above short term monetary gains. The Quebec Government on behalf of the Peoples of Quebec, can set the stage for other provinces in Canada, and indeed other countries to end uranium mining. After more than a hundred years of knowledge and use of uranium throughout Mother Earth for many purposes we have vividly and tragically witnessed what this 4.5 billion year old black rock once mined can be used for. Let us stop the temptation and use of uranium which has always ended in heart wrenching disasters.

Quebec has many a time demonstrated to others in Canada that love of peoples comes first in good governance. "Ban forever Uranium Mining". Let us instead encourage the mining of young minds to find solutions for energy uses from solar, thermal, hydro and other less harmful sources, innovations and technologies waiting to be developed and shared with the world as economic development. Let us save the vast beauty and biodiversity of Quebec and it's Peoples who understand and respect life – the national wealth of Quebec is in the livelihoods of those who have roots in Quebec now and for future generations.

Thank you for your kind attention.
