**Objet:** [POLLURIEL (Bayes)] No uranium mining in Canada

### BAPE-Hearings

Dear Sir, dear Madam,

we have heard about new plans for uranium mining in Canada.

In Germany in former times also uranium mining was done. This is stopped years ago. But there are still a lot of problems, also with radiation.

I myself am living in front to the one and only uranium enrichment plant in Germany, placed in a town called Gronau. So i know personally the uranium-problems. Everywhere the atominc industry produces a lot of atomic waste. Safe storage is not possible. Not in Germany and not in another country of this world.

The Federal Association of Environmental Action Groups is worried about the use of nuclear poer. We have enough safe and natural energies, we dont need nuclear power.

So we ask you: Stop uranium mining in Canada - dont allow new uranium mining.

Best regard

Udo Buchholz, BBU
