Les enjeux de la filière uranifère au Québec

From the Youth Committee

6211-08-012

November 6, 2014

On behalf of the Youth Committee, I am writing this letter in denial of the Uranium mining process. We believe that the youth will benefit from the environment around the community more than the profits the community will be receiving. The youth are currently in a transition stage between the new and old generation and we believe that they will need to keep their culture. By that, we believe that the Uranium mining will greatly impact this negatively. Our culture is highly depended by the people of this community and the youth.

Kitty Minnie Emuk
Youth Committee President.
