I am writing this letter to express my opposition to the Uranium Mining in Quebec, I am not only writing this letter for myself but I am writing it for the future generations. I wish that the Uranium Mining in all of Quebec be stopped. The risks are too high; I want our Nation to be healthy and our animals to be healthy. We all live in a great land where we are not stricken by war and poverty, our health is somewhat better than the average third world person. We should not contaminant our land, water or air.

I wish for our future to be free of Cancers and health problems, I want all pregnant women to be free of worries that the baby they are carrying will be deformed. Our plants and animals need to stay healthy to ensure the future of our people, native non-native, African American or any other race deserves a healthy life and environmentally safe surroundings.

Please help us in our fight against Uranium, decide to never allow they Uranium Mining to develop in Quebec. Do it for the Future and for the now!
