Att'n: Renee Poliquin

To whom it may concern:

I would like to express my strong opposition to the proposed Technical Landfill Site scheduled for Danford Lake, Qc.

I have lived in Danford Lake all my life. I am opposed to the TLS as I feel that there would be a tremendous amount of truck traffic added to our highways.

The water table in this area is quite high as well we are all on well systems and I feel that they could be put a risk if this project comes to be.

I feel that the promoter has deliberately mislead the people of this community with the promise of jobs that likely will not be there...He says that he did not bribe anyone but what about financial incentives?

I sincerely hope that the Committee will see the wisdom in not allowing this project to proceed. We love living in this Municipality and don't want it ruined by GARBAGE.

Sincerely,

Ralph Lafleur
