**Re : Proposed Project for Engineered Landfill Project in Danford Lake, Alley-n
and Cawood Municipality**

My husband and I have had our home here in Danford Lake for over 30 years. I was raised here and went to school from her. My husband is originally from Kazabazua but is now on early retirement here. All during our years of full-time employment we rented in Ottawa but came here every weekend, for Christmas holidays, and for summer vacation with our children. We looked forward over all the years to finally spending our retirement years in Danford Lake along with our family, neighbours, friends, and peers.

We have been, and still are, very involved with events, clubs and associations in this community. Now that we have finally reached the time of life that we have worked for and impatiently waited for, we are both very disappointed to have seen our full-time population decline, our youth being forced to move away for employment, and the **Community of Danford Lake « stagnated »**. We have seen our Municipality's **expenses increase** and the level of taxable income base **« NOT INCREASE »** sufficiently enough to keep pace. Things are at a **« STAND STILL »** and no new proposed changes and/or new plans are able to be initiated.

At last, finally, we have an opportunity to see our life's dreams have a chance to become reality because of the increased revenues we would receive if the proposed project is approved. **IN OUR OPINION** we have confidence in the LDC Project, in the studies presented, and the Government of Quebec. We have faith in our community, our elected Municipal Members, and our Government and, therefore, are **IN FAVOUR** of the Proposed LDC Project .

Wanda Peck-Stevenson

Gerald Stevenson, Municipal Councilor
