Projet d'établissement d'un lieu
d'enfouissement technique à Danford Lake

Alleyn-et-Cawood

6212-03-112

Dear Ms. **Renée Poliquin**.

Thank you for reading my email. I will be brief and to the point.

My involvement with the Danford Lake Dump is from the viewpoint of an environmentalist and land owner on Shea Lake. Shea Lake is on Hwy 301 in between Danford Lake and Kazabazua.

Issue One. Traffic on Hwy 105 and Hwy 103. I attended the Otter Lake BAFE initial meeting on February 28 2007. The dump developer published a paper, documenting the truck traffic along Hwy 103 would reach 122 trucks per day. Over an eight hour day, that is 1.2 trucks every 5 minutes for a solid 8 hour day. Truck noise travels across Shea Lake like thunder. **Therefore every five minutes my family will be reminded that there is a dump just down the road.** Also, increased truck traffic on the winding Hwy 105, where it literally runs at certain places, inches from a cliffs and the Gatineau river will increase the probability of traffic fatalities.

Issue Two. Land Values. **Who would buy residential or cottage property near a dump ?** This area of Quebec will be sentenced to economic decline for years. Cottagers are a big part of the land tax, retail and property development economies that will decrease. Who will compensate my family for the land value loss of our cottage property ? If I had known there was going to be a garbage truck running past my cottage ever five minutes, I would not have invested the time or money at Shea Lake.

Issue Three. How do we know the people of Alleyn Cawood want the dump. **Why was there no referendum?**

I think it is a shame that the rural generated wastes of Gatineau/Hull should be allowed to destroy the beautiful Danford Lake region. The dump should be located where the majority of the garbage is created. This would force local governments and citizens to be responsible for their garbage and to look for alternate solutions, such as **plasma gasification**.

Thank you for listening to one voice. A voice that represents a family and all the families who don't have the time or ability to **speak out again against the Danford Lake Dump**.

sg.

Stephen Gray
