**Poliquin, Renée (BAPE)**

**Objet:** TR : [POLLURIEL (Bayes)] - danford lake landfill BAPE - Bayesian Filter detected spam

Dear Ms. Poliquin,

I am writing as a taxpayer in the Alleyn-Cawood region. I was given your email address when I attended today's BAPE session on the Danford Landfill project. I was unable to register to speak, due to family/scheduling reasons.

However, I did want to make sure that my voice is heard in this process. I will be brief.

My main concern about the landfill project is the location- this is an area of many lakes and rivers, which is the worst possible spot for a landfill. I am concerned that the water table will be contaminated, affecting communities for miles around.

I realize that no community may want a large landfill nearby, but I urge you to take into consideration the concerns about this specific location in terms of the local rivers and lakes and possible contamination of them. I know that other alternatives have been presented such as plasma gasification, which is becoming a solution for other communities with similar waste issues.

I urge the Quebec government not to make a rushed decision to proceed with a landfill in a location that could lead to environmental problems for years down the road.

Thank you for taking my views into consideration.

Yours Sincerely,

Dr. Karen Ferguson
