To Whom it May Concern :

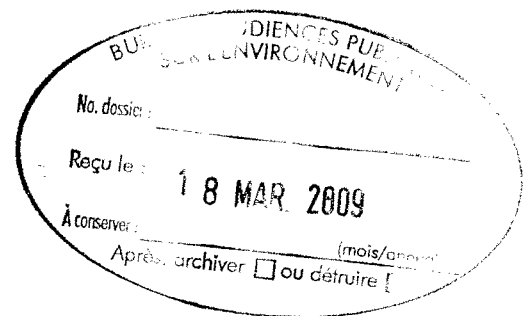

Please accept this letter as solid support for the proposed mining project at Malartic, Quebec of Osisko Mining Corporation.

This project will not only serve as an important engine for the economy of the Malartic, Val d'Or and Rouyn-Noranda area but will also serve as a model for companies to rethink approaches to determining the economic viability of older mine properties. Kudos to Osisko for the intelligent analysis and persistence in pushing this project toward production. Additional kudos for the manner in which the project is being done, correcting legacy environmental problems, limiting the project footprint, dealing with dust, blasting, vibration, water and other potential problems before they become problems. Truly a model for other companies planning similar projects.

Regards,

Jack Stoch
