Regarding the windmills in St. Cyprien de Napierville
 I attended all the ^{B.A.P.E.} meetings for the St. Valentine +
 St. Paul Project and my comments remain the
 same; regarding the present project of St. Cyprien,
 I also attended the B.A.P.E. meetings except Thursday
 afternoon due to a previous engagement.

By nature I am an optimist (usually a realist),
 after attending the meetings, I had the bitter
 impression that the situation was a rushed,
 unrepeat opportunity (a waste of tax-payers'
 money, time & energy) because the ^{Government}
 nation has more impact and rights than we
 possess.

Who can be blamed because instead of creating
 greater harmony and good relations with us,
 while his people impact their project on our
 and fertile agricultural lands in Quebec (we
 that 2% in the province) Was Mr. Gervais not
 witness to the public identification with the
 present Project? Was he not acquainted with
 the mental anguish plain and over
 families against our nation? Good, has no
 limits.

2. We have been summer residents since 1958
and permanent residents since 1991, we have
considered our home in St. Paul as "Our
Little Corner of Paradise" as you may recall, my
husband of 62 years is 83 and I am 81; our
efforts are for future generations: what heritage
do we have generations to come if we do not
preserve our previous land?

Sincerely,
Kathleen R. Dutil
